

With this past weekend's release, lots of new functionality has been added to **on-line DSNP validation in mProducer!**

- All brokers and field agents can use the **DSNP Eligibility Check** tile on the main landing page!!!
 - You can now save the customer and the results of the client's DSNP validation check from this landing page tile!
- The **Medicaid ID** will now be included in the results of your search!
 - Not available in CT
- You will receive additional **Medicare information** when you validate if your client is eligible for a DSNP product!
 - Part A Effective Date
 - Part B Effective Date
 - Does the client have LIS (low-income subsidy)?
 - LIS Level
 - Current Contract Code
 - Drug Gap in Months
- You can use dashes (-) and apostrophes (') in name fields without impacting your ability to locate a matching contact from Medicare and Medicaid.

If you support brokers, please share this exciting news with them and encourage them to validate DSNP eligibility at the point of sale!

Thank you.
